

Business Process Management Platform

Streamline. Digitalize. Optimize.

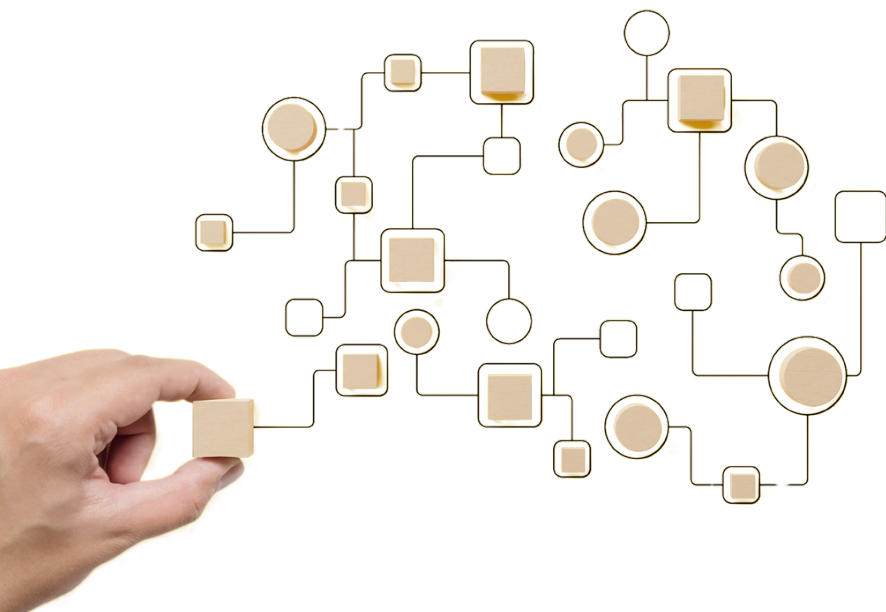

Introducing Sipod's Business Process Management Platform

Sipod's Business Process Management Platform (SBPM) is an innovative tool that can help organizations to streamline their digitalization journey and optimize their business processes.

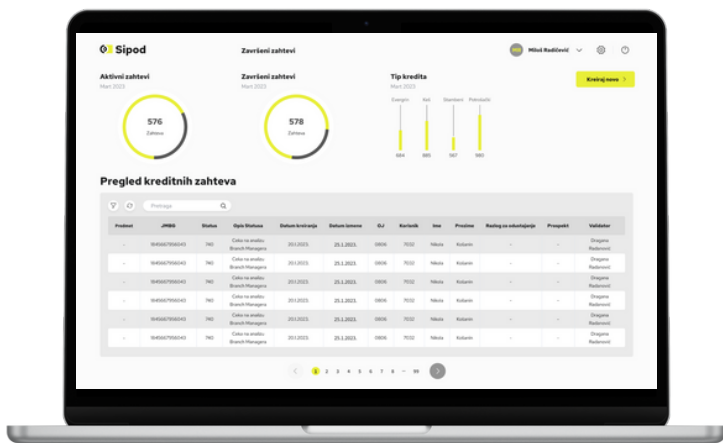

With its BPMN 2.0 and DMN standards, the platform allows process modelling, digitalization, automation and orchestration of complex business processes and decision-making rules, providing real-time visibility into performance, bottlenecks, and opportunities for improvement.

A Flexible and Modular Architecture

The platform's flexible and modular architecture enables quick and easy updates and modifications of business processes, ensuring businesses can adapt and scale as needed. It is easy to change and optimize business processes without additional development costs.

Additionally, the platform provides a robust decision-making and rule-engine tool to help organizations make informed decisions based on data-driven insights.

Real-Time Tracking and Monitoring

One of the key benefits of the Business Process Management Platform is its ability to track and monitor processes in real time, enabling effective monitoring and optimization.

With accurate implementations and standardized process documentation, businesses can eliminate the possibility of incorrect process implementation, reducing errors and improving efficiency.

Versatile Applications

The platform boasts versatile applications across multiple industries, including:

- **FinTech:** It excels in origination, onboarding, scoring, approval, and other related processes.
- **Real Estate:** This platform streamlines the workflow from procurement and field inspection to approval processes and supplier selection.
- **Health Industry:** With procurement, approval, and supplier selection features, the platform ensures operational efficiency.

The Platform is suitable for a wide array of industries!

Flexibility for Continuous Improvement

The platform's flexibility allows continuous process improvements and changes to be implemented quickly and easily, saving significant time and costs.

With a user-friendly interface and the ability to integrate with existing dependent services, Sipod's Business Process Management Platform offers an exceptional user experience and a seamless transition to optimized business processes.

What are the main benefits?

Track and Monitor Processes

The ability to track all business processes' status in real time, enabling effective monitoring and optimization.

Accurate Implementation

Eliminating the possibility of incorrect process implementation through clear, standardized documentation.

Flexible Improvements

Improved flexibility to implement changes and process improvements as needed.

Cost and Time Efficiencies

Significant cost and time savings by streamlining processes and reducing manual intervention.
