Core Capabilities

Process Automation

Analytics & Reporting

Flexible Workflow Adjustments

Modern UI Experience

Automates key banking processes reducing manual work, ensuring accuracy, and improving oversight.

*Effortlessly adaptable.
Seamlessly integrated.
Ready for growth.*

How Origination Works

Model once. Execute anywhere. Evolve continuously.

System retrieves customer data, analyzes risk, generates documents, and stores them automatically.

Scoring engine provides automatic or semi-automatic approval decisions.

Automations:

External data sources

CORE handling

Full/semi automation

Mobile-enabled workflows

Roles, Requests & Insights

Application Management

Secure and efficient—each user sees only what's relevant.

Role-Based Access

• Filters • Search
• Calendar • Client messaging

Data & Transparency

Structured data + complete activity history.

Dashboards

Performance, bottlenecks, productivity metrics.
