

Intelligent AI- Powered Document Understanding

- Automate document validation with AI
- Detect inconsistencies, fraud, and anomalies early
- Adapt validation rules to your business and regulations
- Integrate seamlessly with existing systems

**Drastically reduce
time spent on
manual document
review and validation**

We build mission-critical platforms and digital products centered around complex business processes, with strong requirements for reliability, scalability, and regulatory compliance.

Doc Validator

AI-Based Power Document
Understanding and Validation Platform

Functionalities

Configurable validation rules aligned with processes, regulations and internal policies

Quantitative checks (amounts, dates, limits, coverage, consistency) and qualitative checks (clauses, intent, exclusions) using LLMs

Intelligent document summarization highlighting risks, discrepancies, and missing information

Fraud and anomaly detection to identify suspicious patterns, inconsistencies, and irregular document behavior

Full audit trail and explainable AI outputs supporting regulatory and internal audit

Benefits

Seamless integration with internal and external systems to enrich document validation with trusted data sources

Lower risk of human error, omissions, and non-compliance penalties

Reduce audit preparation time and operational document validation costs

Improve accuracy and consistency across all document-based workflows

Ensure consistent application of rules across branches, teams, and regions

Schedule a Meeting
